

## ***Design Model of Care***

### **Harm Reduction Phase:**

- Homeless and/or sleeping rough
- Survival sex work
- Trafficking
- No access to food security
- Difficulty with accessing community resources due to:
  - o Limitations/restrictions
  - o Capacity/disability
- Financial insecurity/poverty
- Identifying needs to build community care team
- Poor physical and/or mental health

### **Stabilization Phase:**

- Sheltered
- Engaged with some accommodation (Physical and social)
- Setting and acting upon goals
- Increased financial security
- Decreased criminal activity
- Knowledge and/or awareness of food security, community resources
  - o As well as working on goals for access
- Increased physical and/or mental health
- In process of building and engaging with community care team

### **Comprehensive Care Phase:**

- Awareness and reflection stage
  - o Setting long term goals, achieving them
  - o Able to acknowledge needs
- independently accessing supports from care team
- Engaged in harm reduction best practices, and self-identified as safe in their substance use.
